Table POL18: *As you may know, the United Nations reported that hundreds of billions of dollars are needed each year to protect developing countries from the effects of climate change (such as flooding, wildfires, and landslides), though the amount these countries are receiving from wealthier nations is 5-to-10 times less than what is needed.How much responsibility, if any, do you think the United States has to increase its contributions to developing nations to help protect them against climate change?*
